**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### RESTRICTION REQUIREMENT

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-29, 74-83, and 89 drawn to an apparatus/plant for hydrolyzing a protein-containing raw material, classified in class 99, subclass 485. (It should be noted that claim 89 is an improper hybrid claim since it overlaps into two different statutory classes of invention. MPEP § 2173.05(p). For the purpose of restriction same is taken to be an apparatus claim).
  - II. Claims 30-65 and 84-86, drawn to a method for hydrolyzing a protein-containing raw material, classified in class 426, subclass 656.
  - III. Claims 66-73, 87, and 88, drawn to a hydrolyzing product of a protein-containing raw material, classified in class 426, subclass 656.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II/III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus may be used for treating eggs wherein same are ground and heat treated during extrusion (e.g. pasteurizing), cooled in an inactivation area, and provided to a separation area wherein the shell is separated from proteinaceous egg.
3. Inventions II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the

process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product may be made by a process wherein a reaction mixture is chemically rather than enzymatically hydrolyzed.

4. Because these inventions are distinct for the reasons given above and the search area and search strategy required for any one of the groups is not the same as that required for any other group, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
